DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for securely delivering multimedia content to a wireless user. Each of the independent claims identify the uniquely distinct features of "an event-triggered content delivery mechanism, wherein said event-triggered content deliver?/ mechanism receives requests to transfer said content, transfers said content from said application server to said application layer broker, and generates an event notification to at least one of said wireless communication devices, wherein said event notification provides said indirect coupling and includes linkage information to allow said at least one of said wireless communication devices to access said content from said application layer broker". The closest prior arts, Garrity et al. (US 6,230,205); Raz (US 6,292,827); and Mitchelmore (US 2002/00909134);, each disclose a wireless communication system for receiving multimedia data. However, each of them fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
